DETAILED ACTION

1. This action is in response to the communication filed on 04/27/2005.

Claims 1-15 are pending in the application.

Specification

2. This specification is object to.

- The abstract of the disclosure is objected. The abstract appears obtained from a copy. The abstract must commence on a separate sheet and contains only abstract text. See MPEP § 608.01(b).
- The arrangement and the content of this specification fail under 37 CFR 1.77(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "**Not Applicable**" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 2191

- It should be noted that this application contains continuation data, PCT and filed priority over a foreign application; section heading (b) must be applicable. If necessary, providing with a statement included with incorporation by reference. See 37 CFR 1.57 - Incorporation by Reference.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-15 are indefinite. The dependency of the claims is unclear. For example, claim 2, "A method" that is an independent claim. However, it recites as being dependent on claim 1. An independent claim cannot recite as an independent scope. Claims use multi-dependency. This type of claims is indefinite. Furthermore, Claims must present as a single invention. Since the claims' scopes of these claims are indefinite, an amendment should direct the claims as a single invention. Otherwise, it would be subjected to the restriction and election requirement.

Claims 1-15 also fail to show as being acted. It appears a manual activity.

For example, Claim 1 recites "accessing configuration data": this act appears being done manually by a user.

"Determining (110) configuration data corresponding to the component" It is unclear. It appears a user using his observation on configuration data.

"Creating (112) an instance of the component": It appears a use manually create an instance.

"configuring (116) the instance of the component by configuring its properties in dependence on the configuration data" It appears the user manually configures the instance.

Art Unit: 2191

The performing of the method is unclear whether it is done manually by a user or done dynamically. The claims fail to define or point out the claims' subject matters. The claims are indefinite.

Claim 8 appears being a different invention from Claim 1. The claim also fails to point out the claims' subject matters because it appears being performed manually.

Claims 9 is unclear because the scope of this claim is different from its dependency - claim 8.

Claim 15, appears has no method.

All Claims 1-15 fail to present in a clearly manner for examination. The Claims fail under 35 USC 112, second paragraph.

Election/Restrictions

5. The Claims 1-15 contain multiple distinct inventions, but bundled together under dependent forms. Examiner cannot determine the groups of the inventions. The rejection of Claims 1-15 under 112 paragraph is provided so that a clear scope of single invention is seen or restriction/election requirement will be carried out.
